Control arm bushings

Control arm bushing to fit **BMW E24, E28**
MEYLE No. 300 311 2906/HD
Reference No. 31 12 9 058 816
31 12 9 058 817
31 12 9 058 818
31 12 9 058 819

Control arm bushing to fit **BMW E39**
MEYLE No. 300 311 2914/HD
Reference No. 31 12 9 068 753

Control arm bushing to fit **BMW E31, E32, E34**
MEYLE No. 300 311 2103/HD
Reference No. 31 12 1 136 605
31 12 1 136 607
31 12 1 139 456

Exceeds OE Specifications

Control arm bushings to fit **BMW E28, E31, E32, E34, E39**

After average mileage, many 5-series BMW drivers notice vibrations when steering. And possibly the whole front end might vibrate when braking and turning at the same time.

Repair shops, which do not frequently service the BMW 5-series will often balance the tires in such cases, replace the brake discs or align the front axle.

However, the considerably strengthened MEYLE control arm bushings permanently prevent the front axle from vibrating. Our engineers have succeeded in combining the positive characteristics of the different OE bushings to give the reinforced MEYLE bushings a wider application range.

These bushings are of course also fitted to the corresponding MEYLE control arms.

Control arm bushings
